

Coler Coastal Resiliency Project Fact Sheet

About the Project

NYC Health + Hospitals/Coler Skilled Nursing Facility is located on the north side of Roosevelt Island. During Hurricane Sandy in 2012 the facility suffered flood damage to critical building infrastructure.

In the aftermath of Sandy, Senator Chuck Schumer helped secure a large FEMA grant for NYC Health + Hospitals (H+H). The grant seeks to protect the City's most vulnerable public hospitals from coastal flooding and includes NYC H+H/Coler.

Currently, H+H is in the pre-design phase for a new perimeter hazard mitigation system at NYC H+H/Coler. To protect the long-term care facility from future damage, NYC H+H will design and construct a new perimeter hazard mitigation system at Coler. This mitigation system will create a berm barrier, provide protection for up to a 500-year coastal flood event, and will protect the campus from major storm events.

Below are renderings that depict what the landscape can look like after the completion of this project.

Get Involved

- ▶ **Share** your vision and preferences with the project team through our online project input survey at colercoastalresiliency.com/survey or by scanning this QR code.

- ▶ **Reach** out to the project team at colercoastalresiliency@gmail.com.

- ▶ **Visit** the project website at www.colercoastalresiliency.com.
